

> Data Engineer SAP (f/m/x)

Work Environment

In our team, “we” is more important than “me”. At Data Analytics and Machine Learning, our objective is to jointly create synergies in order to provide flexible and cost-efficient solutions for innovative data services with a high level of in-house development. Always on the lookout for new technologies, we lay the foundation for data projects and promote data awareness through our company-wide data community. In our international team, we work in close collaboration with all business divisions at AUDI AG as well as with the VW Group. You can learn more about our Data Analytics and Machine Learning division here: <https://www.audi.com/en/career/professionals/it-at-audi.html>

Job Purpose/Role

- > You will take on the further development and optimization of our Hybrid Audi Analytics platform
- > You will help design the Audi SAP Business Intelligence strategy
- > You will take on the technical management, design, implementation, and rollout of projects in various data domains
- > You will actively support the further development of our architecture approaches for enterprise data warehousing

Key Requirements/Skills/Experience

- > You have successfully completed a technical degree in business informatics, computer science, industrial engineering, mathematics or a comparable subject
- > You are very familiar with the SAP world and have knowledge of the SAP BW, BusinessObjects, SAP Analytics Cloud, SAPUI5 technologies and the associated development and end application tools (SAP HANA Studio / Eclipse, WebI, Lumira, Analysis for Office)
- > You are a proficient user of programming languages such as JavaScript, ABAP, and SQL
- > You have basic knowledge of cloud technologies (e.g. HANA Enterprise Cloud, AWS)
- > You have basic experience with agile software development (scrum) and the associated tools (Jira, Confluence)
- > You can understand and communicate complex issues well
- > Good German and English skills round off your profile

Additional Information

1/1

This position is available immediately at AUDI AG in Ingolstadt. Generally all positions at Audi can be filled on a part-time basis. Applications must be submitted in electronic form via our job portal.

We embrace diversity, actively encourage inclusion and create an environment that fosters each employee's individuality in the interests of the company.
